No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1983 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

Contents of Volume 18

NUMBER 1, JANUARY 1983

ANTON LEISCHNER. Side Differences in Writing to Dictation of Aphasics with Agraphia: A Graphic Disconnection Syndrome	1
HIRAM H. BROWNELL, DEE MICHEL, JOHN POWELSON, AND HOWARD GARDNER. Surprise But Not Coherence: Sensitivity to Verbal Humor in Right-Hemisphere Patients	20
D. F. SEWELL AND L. PANOU. Visual Field Asymmetries for Verbal and Dot Localization Tasks in Monolingual and Bilingual Subjects	28
DAVID P. ROELTGEN AND KENNETH M. HEILMAN. Apractic Agraphia in a Patient with Normal Praxis	35
LYNNE W. CLARK AND MICHAEL L. GROSSFELD. Nature of Spelling Errors in Transcortical Sensory Aphasia: A Case Study	47
DENNIS L. MOLFESSE AND ALBERT SCHMIDT. An Auditory Evoked Potential Study of Consonant Perception in Different Vowel Environments	57
JENNIFER HORNER AND E. WAYNE MASSEY. Progressive Dysfluency Associated with Right Hemisphere Disease	71
BRUCE J. LEKSA AND THOMAS L. JACKSON. Language Lateralization as Measured by Dichotic VRT and Recognition Tasks	86
JACK GANDOUR AND ROCHANA DARDARANANDA. Identification of Tonal Contrasts in Thai Aphasic Patients	98
S. E. BLUMSTEIN, H. GOODGLASS, S. STATLENDER, AND C. BIBER. Comprehension Strategies Determining Reference in Aphasia: A Study of Reflexivization	115
ALFONSO CARAMAZZA, RITA SLOAN BERNDT, AND ANNAMARIA G. BASILI. The Selective Impairment of Phonological Processing: A Case Study	128
PAPERS TO APPEAR IN FORTHCOMING ISSUES	175

NUMBER 2, MARCH 1983

LIDIA LONZI AND M. ESTER ZANOBIO. Syntactic Component in Language Responsible Cognitive Structure: Neurological Evidence	177
STEEN LARSEN AND KIRSTEN HÅKONSEN. Absence of Ear Asymmetry in Blind Children on a Dichotic Listening Task Compared to Sighted Controls	192
NICO BRAND, IET VAN BEKKUM, MIEKE STUMPEL, AND JAN H. A. KROEZE. Word Matching and Lexical Decisions: A Visual Half-Field Study	199
F. MICHEL AND E. ANDREEWSKY. Deep Dysplasia: An Analog of Deep Dyslexia in the Auditory Modality	212

CATHERINE C. WHITEHOUSE. Token Test Performance by Dyslexic Adolescents	224
M. P. BRYDEN, KEVIN MUNHALL, AND F. ALLARD. Attentional Biases and the Right-Ear Effect in Dichotic Listening	236
HILARY BUXTON. Auditory Lateralization: An Effect of Rhythm	249
K. WILLMES, K. POECK, D. WENIGER, AND W. HUBER. Facet Theory Applied to the Construction and Validation of the Aachen Aphasia Test	259
MARY M. WELLMAN AND MAX ALLEN. Variations in Hand Position, Cerebral Lateralization, and Reading Ability among Right-Handed Children	277
SUSAN E. LANGMORE AND GERALD J. CANTER. Written Spelling Deficit of Broca's Aphasics	293
HANNA K. ULATOWSKA, ALICE WEISS DOYEL, RENEE FREEDMAN STERN, AND SARA MACALUSO HAYNES. Production of Procedural Discourse in Aphasia	315
✓ R. L. RAPPORT, C. T. TAN, AND H. A. WHITAKER. Language Function and Dysfunction among Chinese- and English-Speaking Polyglots: Cortical Stimulation, Wada Testing, and Clinical Studies	342
PAPERS TO APPEAR IN FORTHCOMING ISSUES	367
AUTHOR INDEX FOR VOLUME 18	368

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews, and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery, and speech pathology. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Manuscripts should be submitted to either:

Editor: Harry A. Whitaker, Ph.D.
Department of Hearing
and Speech Sciences
University of Maryland
College Park, Maryland 20742

Associate Editor: George Ojemann, M.D.
Department of Neurological Surgery, RI-20
University of Washington
Seattle, Washington 98195

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Brain and Language* represent the opinions of the author(s) and should not be construed to reflect opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Authors should submit manuscripts in *quadruplicate* (one original and three copies), typewritten, double-spaced on one side of 8½ × 11 in. white paper. The original and two copies of all artwork, tabular material, photographs, etc., must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces), and the complete mailing address of the author to whom all correspondence should be sent. **Page 2** should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise it should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing.

Tables should be numbered in order of appearance (with Arabic numerals): they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lower

case letters,^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals,^{1,2}, etc., cited consecutively throughout the article, starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1948) or (Russell and Espir, 1961). If more than one paper was published by the same author in a given year, the correct style is Broca (1861a) or (Broca, 1861b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

Allison, R. S. 1962. *The senile brain*. London: Edward Arnold.

Koh, S. D., Vernon, M., & Bailey, W. 1971. Free-recall learning of word lists by prelingual deaf subjects. *Journal of Verbal Learning and Verbal Behavior*, **10**, 542-547.

Luria, A. R., & Tsvetkova, L. S. 1970. The mechanism of "dynamic aphasia." In M. Bierwisch & K. E. Heidolph (Eds.), *Progress in linguistics*. The Hague: Mouton. Pp. 187-197.

(Use underlining for journal and book titles only.)

Proofs. Galley proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.
